## **ANSWERS TO QUESTIONS: REQUEST FOR PROPOSAL WEBSITE DESIGN, DEVELOPMENT, AND HOSTING SERVICES**

CITY OF CHENEY – IT DIVISION  
RFP #10-IT-001  
RESPONSE DUE: March 15, 2010 at 1:00

*Responses to questions posed by 3-5-2010 at 0800 hours.*

1. Budget – We do not have a set budget number. We are restricted by a set of funds to accomplish multiple projects, but are looking to purchase a cost effective website that fulfills our needs.
2. Statistics – We do not have any statistics about our website.
3. Training – The number of people that require training will depend on your product and how it is used by a typical workforce. Numbers that can help you decide on the answer is that we will have 4 people for security level functions, 8 Department Heads, and 8 people from departments responsible for updating their pages.
4. Experience and qualifications– Local can be taken to mean municipal government websites. Statewide contracts that include municipal level work would apply.
5. Software Requirements – Our intent is to have the site hosted. The City does have Virtualized servers so we can add just about any necessary software on our end as long as it is compatible with VMWare. Our end users are generally familiar with Microsoft products. Beyond common compatibility we are placing no set restrictions on software and are open to viewing vendor solutions.
