**SUMMARY** The City needs to replace some the servers and SANS in our technology infrastructure. The plan is to replace these in our main IT room and move the replaced hardware to the backup site. The servers only have a 5-year lifespan. For future planning, the city will replace a number of servers every 2 years and move those to the backup site spreading the cost more evenly in the annual IT charges to the departments. Proposed funding for this project will be split between the Mayors Contingency fund and ARPA funding. After approval, a budget amendment will come forward to fund the expense.
