City of Cheney - 609 Second Street, Cheney, WA 99004

### **2018 Irrigation Conservation Schedule**

Irrigation season is upon us. We appreciate everyone being mindful of conserving water when programming your irrigation system or manually watering lawns. Irrigating lawns every 2 to 3 days with a 1-inch-per-week application is adequate to sustain a healthy lawn. Watering during the coolest part of the day (late night or early morning) allows water to soak into the lawn and not evaporate into the air caused by heat. A healthy balance to your lawn soils also conserves water. Setting irrigation timers to certain days based on your odd or even address is a good practice. Shutting down irrigation during periods of rain through the summer season also helps to conserve water.

To maximize our potable water pumping efficiency and maintain safe reservoir levels, the City of Cheney is asking city residents and businesses to follow this schedule for outdoor watering, **effective immediately**. This applies to automatic sprinkler systems and hand watering; please set your timers accordingly. If questions, please call (509) 498-9293.

#### **Residential Customers**

Odd Number Addresses: Water on odd calendar dates.

Even Number Addresses: Water on even calendar dates.

Lawn Watering Times: 5:00 a.m. to 10:00 a.m. **or** 7:00 p.m. to 11:00 p.m.

*If your automatic sprinkler timer does not have an odd/even program, then please schedule your usage for 3-4 days per week.*

Gardens and Flowers: 8:00 p.m. to 8:00 a.m. Use a soaker hose, drip system, or water by hand. Apply mulch to retain moisture.

As a reminder ... Sutton Park, Moos Field, and Salnave Park are irrigated from a well that is separate from the City's potable water system and reservoirs.

#### **General Irrigation Tips**

- Avoid watering in the middle of the day when the hot sun will evaporate much of the water.
- Established lawns only need up to one inch of water a week, including rainfall.
- Shrubs, trees, and other perennials generally will need even less because of their deeper root structure.
- If water begins to pool, turn off your sprinkler to prevent overwatering and runoff.
- Watering plants or grass too frequently can drown plants or result in shallow roots.
- Overwatering can lead to a host of problems including weed growth, disease, fungus, and stormwater runoff that pollutes local waterways with fertilizers and pesticides.

### **Meeting Dates & Events**

June 6: Cheney Merchants' Association, 6:30 pm, Holiday Inn	June 13: Park Board, 6 pm, Wren Pierson Community Center
June 7: Historic Preservation Commission, 5:15 pm, City Council Chambers	June 22: Blood Drive, 1:30-5:00 pm, Marketplace Restaurant, 1011 1st Street
